

Proposed Solution

Date	31 July 2026
Project Name	Indoor Gardening Services Management (IGSM)
Platform	ServiceNow

Done by Dega Leela Ramana

Proposed Solution Template

S.No.	Parameter	Description
1	Problem Statement	Manual handling of indoor gardening service requests, technician assignment, maintenance scheduling, and approval processes causes delays, poor tracking, and inconsistent service quality.
2	Idea / Solution Description	Develop a ServiceNow-based Indoor Gardening Services Management (IGSM) application with a custom request table, Service Catalog, automated approval workflows, technician assignment, SLA monitoring, notifications, and dashboards.
3	Novelty / Uniqueness	A centralized ServiceNow solution that integrates request management, workflow automation, role-based security, SLA tracking, and reporting within a single digital platform.
4	Social Impact / Customer Satisfaction	Improves service transparency, faster response times, timely plant maintenance, secure request tracking, and better communication between customers and technicians.
5	Business Model (Revenue Model)	Service subscription plans, annual maintenance contracts (AMC), premium maintenance packages, emergency service charges, and enterprise indoor plant management services.
6	Scalability of the Solution	The scoped application supports additional customers, technicians, service categories, locations, and automation workflows through the ServiceNow platform without major architectural changes.
