

Define the Problem Statements

Date	31 July 2026
Project Name	Indoor Gardening Services Management (IGSM)
Platform	ServiceNow

Done by Dega Leela Ramana

Customer Problem Statement

The following problem statements capture the key challenges faced by customers, technicians, and service managers. The content is wrapped within each cell for readability.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A customer with indoor plants	Request gardening services and track my request status online	I cannot see real-time updates after submitting my request	The service process is manual and communication is delayed	Uncertain and dissatisfied
PS-2	A gardening technician	Complete assigned maintenance tasks within the SLA timeline	Task assignments and priorities are not clearly organized	There is no automated workflow or SLA-based monitoring	Overloaded and less productive
PS-3	A service manager	Monitor service performance, technician workload, and SLA compliance	I do not have a centralized view of requests and technician progress	Reporting and performance tracking are not automated	Unable to make timely operational decisions

Problem Summary

Customers need a transparent way to request services, schedule plant maintenance, and receive timely updates. Technicians require automated task assignment and SLA-based workflows, while managers need dashboards and reports to monitor service performance. The IGSM application addresses these challenges through ServiceNow automation, notifications, role-based access control, SLA monitoring, and centralized reporting.
